DEPARTMENT OF ENGLISH

Academic Action Plan for the year 2023-24

SL NO	DATE	EVENT
1.	Oct 2023	Extension Activity on Communication Skills at a School of Chikodi
2.	Nov 2023	Workshop on "Significance Of Literature in Life" Resource Person : Dr.Pooja Halyal Asst.Prof Dept.of English RCUB
3.	Dec 2023	Guest Lecture on Feminism.(Online)
4.	Jan 2024	Essay Competition on Role of English Language in competitive World
5.	Feb 2024	National Level Webinar on "English For Competitive Exams as PDO, SSP, FDA & SDA.
6.	May 2024	Extension Activity on Business Writing at Bank in Chikodi
7.	June 2024	State Level Quiz on English Literature. (Online)
8.	July 2024	Group Discussion On Spoken English

DEPARTMENT OF ECONOMICS

Academic Action Plan for the year 2023-24

Sl.No.	Date & Month	Events
1	November-2023	To conduct bridge course for first semester Students
2	December - 2023	57 th A. D. Shroff Memorial Elocution Competition for College Students
3	January - 2024	Special Guest Lecturer by Dr. D. N. Patil, Ranni Channamma University, Belagavi Topic :Basic Economics
4	February-2024	Extension Activity: Socio-Economic Survey of Villegge Hirekudi
5	May - 2024	Industrial Visit For B.A. Final year and Third Semester Students to Sugar Industry to study about Socio-economic and Labor Problems of Sugar Industry worker in DKSSK Factory Chikodi, Belagavi
6	June - 2024	Special Guest Lecturer by Dr. Dileep Kamble HOD, S.D.V.S. Sanghas, S.S.Arts College & T.P Science Institute Sankeshwar Topic :Rural Development
7	July - 2024	To Organize inter College Debate Competition
8	August - 2024	To Motivate the students for competitive exams to strengthen their carrier

Following staff members were present during the planning

1. Shri. J. S. Barangiyavar
2. Dr. Suvarna S. Madar

DEPARTMENT OF EVs

Name : Akshata . R. Harake

Class : B.Sc IInd sem

Roll No : 15

Submit Date : 20/07/2024

Teacher signature

1] Explain the structure and functions of forest and desert ecosystem.

A forest is a large area covered chiefly with trees and undergrowth. It consists of various layers that interact to form a complex ecosystem. Here's an overview of structure and function of a forest:-

* Structure of a forest

1] Canopy layer:- This is the upper layer of the forest, formed by the crowns of the tallest trees. It absorbs most of the sunlight and provides habitat for many species.

2] Understory layer:- Located beneath the canopy, this layer consists of smaller trees and shrubs. It receives less light and has a humid environment, supporting diverse plant and animal life.

3] Shrub layer:- Below the understory, this layer includes woody plants and bushes. It provides shelter and food for various animals.

4] Herb layer:- This layer contains non-woody plants like grasses, ferns and flowers. It thrives on the forest floor where some light reaches through the canopy.

5] Forest floor:- This bottom layer is covered with decomposing leaves, twigs and other organic matter. It is crucial for nutrient cycling and supports decomposers like fungi, bacteria and insects.

* Functions of a forest

1] Biodiversity:- Forests are home to a vast array of plant and animal species, contributing significantly to global biodiversity.

2] Climat Regulation:- Forests play a vital role in regulating the earth's climate by absorbing carbon dioxide during photosynthesis and releasing oxygen.

3] Water cycle :- Forests influence the water cycle by intercepting rain fall, promoting infiltration into the soil and reducing surface runoff, which helps prevent flooding and maintains groundwater levels.

4] Soil conservation :- The root systems of trees and other vegetation help stabilize the soil, preventing erosion and maintaining soil health.

5] Habitats :- Forests provide habitat and food for countless species, supporting complex food webs and ecological interactions.

6] Resources :- Forests provide habitat and food for countless species, supporting complex food web, valuable resources, including timber non-timber products and ecosystem services.

7] Cultural and Recreational value :- Forests have significant cultural, spiritual and recreational importance for many human societies.

Overall, forests are essential for the health of the planet, supporting ecological balance, biodiversity and human well-being.

* Desert Ecosystem :-

A desert ecosystem is characterized by its arid conditions, extreme temperature and limited vegetation despite these harsh conditions. Desert support a unique array of plant and animal life that has adapted to survive with minimal water. Here's an overview of the structure and function of a desert ecosystem.

* Structure of a Desert ecosystem

1] Abiotic components

- Climate :- Desert experience extreme temperatures with hot days and cold nights rainfall is infrequent and unpredictable.
- Soil :- Desert soils are typically sandy or rocky, with poor nutrient content and low organic matter.
- Water :- Water is scarce often present only in the form of occasional rain or underground aquifers.

2] Biotic components

- Vegetation :- Desert plants are adapted to conserve water common types include cacti, succulents, shrubs and grasses these plants often have deep root systems reduced leaf surface area and the ability to store water.
- Animals :- Desert animals are adapted to the extreme conditions to and scarcity to of water. common species include reptiles mammals, birds and insects many of these animals are ~~not~~ nocturnal avoiding the heat of the day.

* Function of a Desert Ecosystem

1] Biodiversity :- While deserts may seem barren they support a variety of specially contributing to global biodiversity.

2] Climate Regulation :- Desert play a role in global climate patterns. their high albedo helps regulate temperature by reflecting sunlight.

3] Water conservation :- Desert plants and animals have evolved mechanism to conserve water, providing insights into drought resistance and water conservation strategies.

4] Soil stabilization :- Vegetation in deserts helps stabilize the soil, reducing erosion and dust storms.

5] Nutrient cycling :- Although limited nutrient cycling occurs through the decomposition of organic matter by microorganisms, contributing to soil formation and fertility.

6] Resource provision :- Deserts provide resources like minerals, fossil fuels, and medicinal plants. They also offer opportunities for solar energy due to their high solar insolation.

7] Cultural and Recreational value :- Deserts have cultural significance for indigenous peoples and offer unique recreational opportunities like hiking, wildlife watching, and tourism.

Overall desert ecosystem through harsh and seemingly inhospitable are vital components of earth's biodiversity and climate systems. They showcase remarkable adaptations and provide unique ecological functions and resources.

1] What is an ecosystem

An ecosystem is a geographic area where plants, animals and other organisms as well as weather and landscape work together to form a bubble of life ecosystem containing biotic or living parts as well as abiotic factors or non-living parts. biotic factors include plants, animals and other organisms abiotic factors include rocks, temperature and humidity.

Every factor in an ecosystem depends on every other factor either directly or indirectly a change in the temperature of an ecosystem will often affect what plants will grow there for instance animals that depends on plants for food and shelter will have to adapt to the changes move to another or perish.

Ecosystem can be very large or very small tide pools. the ponds left by the ocean as the tide goes out are complete tiny ecosystems tide pools contain seaweed a kind of algae, which uses photosynthesis to create food. herbivores such as abalone eat the seaweed carnivores such as stars eat other animals in the tide pool such as clams or mussels. tide pools depend on the changing level of ocean water some organisms such as seaweed, thrive in an aquatic environment when the tide is in and the pool is full. other organisms such as hermit crabs, cannot live underwater, and depend on shallow pools left by low tides in this way, the biotic parts of the ecosystem depend on abiotic factors.

The whole surface of earth is a series of connected ecosystems. are often connection in a larger biome. biomes are large sections of land, sea or

atmosphere forests ponds, reefs and tundra are all type of biomes. they are organized very generally based on the type of organisms that live in them within each forest each pond each reef or each section of tundra you'll find many different ecosystems.

For thousands of years of people have interacted with ecosystems many cultures developed around nearby ecosystems. many native American tribes of North America's great plains developed a complex lifestyle based on the native plants and animals of plains ecosystems. for instance Bison a large grazing animal, native to the great plains became the most important biotic factor in many plains Indian cultures such as the Lakota or Kiowa. Bison are sometimes mistakenly called buffalo. these tribes used buffalo hides for shelter and clothing, buffalo meat for food and buffalo horn for tools. the tallgrass prairie of the great plains supported bison herds which tribes followed throughout the year.

Assignments 2023-24

B. Sc I Semester students are informed to complete the given assignments and submit the same on or before 30.01.2024.

Sl. No.	R. No.	Name of the student	Topic
1.	03	Arati B. Chougala	Plasma membrane: Chemical structure & Function
2.	17	Radhika A. Chougala	Protein targeting
3.	20	Ambika D. Bhimnaik	Cytoskeleton: microtubules, microfilaments and intermediate filaments
4.	23	Rani V. Pujari	Mitochondria: structure, oxidative phosphorylation and electron transport system
5.	39	Amruta S. Dhanwant	Structure and function of Peroxisomes and Ribosomes
6.	46	Deepa S. Pujari	Cell cycle and its regulation; Mitosis
7.	47	Shweta R. Shiram	Meiosis and Apoptosis
8.	48	Pallavi S. Badode	Signal transduction, intracellular signaling via G-protein linked receptors
9.	53	Kamrunissa A. Sayyed	Cell-cell interaction: Cell Adhesion Molecules (CAMs), Cellular junctions
10.	54	Chandrakant Baligar	Mendel's laws- Monohybrid and Dihybrid cross
11.	56	Madhuchandrika R. Sadalage	Complete and Incomplete Dominance, Mechanism of sex determination in <i>Drosophila melanogaster</i>
12.	59	Vaishnavi D. Kivade	Sex-linked characteristics in Humans and Dosage Compensation
13.	61	Priyal S. Huddar	Multiple Alleles, and Gene Interaction
14.	63	Kedari I. patil	Sex-influenced and Sex-limited characteristics
15.	67	Saniya J. Peerwale	Cytoplasmic inheritance and Genetic Maternal effect
16.	81	Ishwari S. Pattanshetti	Environmental effect on Gene expression and Inheritance of continuous characters
17.	82	Kamble Vishwajeet Anil	Patterns of inheritance: Autosomal dominance and Autosomal recessive
18.	84	Spoorti G. Dangi	Patterns of inheritance: X-linked dominance and X-linked recessive
19.	85	Suprema S. Jogalekar	Human karyotyping
20.	92	Sahana A. Ghate	Infectious diseases: Structure, life cycle, causes, symptoms and control of <i>Trypanosoma</i> and <i>Giardia</i>
21.	97	Gayatri M. Mariyai	Chromosomal anomalies (abnormalities): Structural and Numerical aberrations with examples
22.	100	Chaitan R. Tattimar	Structure, life cycle, causes, symptoms and control of <i>Wuchereria bancrofti</i>
